

## Immigration

In an effort to understand our current catastrophic immigration policy, we first need to examine and try to understand how we arrived here with total open border policies under the present Democratic political party currently in control and power.

Prior to the USA becoming a Republic with a democratic system of government all immigrants coming to our shores were not automatically accepted and welcomed. The colonies had certain requirements which all people coming to our colony shores had to comply with. Often all hopeful individuals coming to our colonies were not admitted since they did not fulfill the colonial requirements to immigrate to the new land. They were returned and shipped back to their European homeland.

After the formation of the USA as an independent country, the USA had specific immigration policies from its inception as a country until President Biden's term of office in 2020. The policies varied from one presidential term to the next. However, none ever had an open door policy as it is now under the current democratic regime. In the past, a number of presidents set up quotas for all the countries in the whole world whose residents wished to immigrate to the USA Land of Opportunity. The quota system allowed for between 2% to 3% of a country's population could immigrate to the USA. However, there was no immigration permitted in some countries. The reasons were numerous and varied from country to country.

Our open-door policy is a total disaster, not because we don't have sufficient laws to control entrance into our country but because the laws are not applied or enforced. The total blame for the above rests on the shoulders of the President who continues to ignore all our border catastrophes.

There have always been immigration problems on our borders between USA and Mexico but nothing like we are experiencing now and have been for the past two years. Certain Americans think that well-trained dogs would assist in locating illegal immigrants. This has been a lost cause since over time all the border dogs were poisoned in a short period of time. Also, the numerous tunnels under the wall from Mexico to the USA are unknown since they run from a house in Mexico to a house in the USA. There are many other tunnels used by the drug cartel in the most remote areas. Other illegal immigrants have devised methods to climb over the wall. The terrain where the wall is built is difficult and dangerous. Due to terrain complexity, there are many holes in the wall. President Trump contracted the building of approximately 500 miles of wall but many more miles exist to be built within with extremely high cost to the American people. A great need for many more Border Patrol agents is a primary necessity.

Due to the current open-door policy of the current administration, the entire USA is affected negatively and at risk personally, socially, and financially. The entire country that is the USA is overrun by drug Lords who are deeply involved in drug sales and distribution resulting in many deaths of young people. Human trafficking rings are now operated across the entire country using and abusing teenage girls and young women as payment for getting them as illegal immigrants into the USA.

As I view the lack of enforcement of our laws, our own government is trying to ruin the country and destroy our freedoms of life liberty, and pursuit of happiness from within. The federal government gives thousands of dollars to illegal immigrants and pays for their transportation around the country at the expense of all the senior citizens, who are on fixed incomes and struggling to make ends meet.

At this time the greatest danger for all American citizens is the illegal immigrants that have entered the USA under President Biden to his open-door policy. With over 5,000,000 plus new illegal immigrants entering the USA under President Biden's leadership, the entire country is in deep trouble every state is suffering due to dispersing of illegal immigrants throughout all the lower 48 states. Due to the open-door policy of President Biden the entire country has been infiltrated with individuals who are only here to personally benefit in ways humanly possible.

Drug cartels are operating throughout the land with many Americans dying due to methamphetamine. Human trafficking is at an all-time high. Many need medical treatment and are taxing our hospitals to the point of bankruptcy. However, the federal government stands by watching but not helping financially as it should. The federal government created the problem and they are financially responsible to remedy the entire immigration problem created under President Biden's leadership.

To remedy the problem, the following steps should be taken in order to enter the USA at any port of entry:

- 1.) All illegal immigrants must have a complete and thorough physical to ensure no contagious diseases coming into the USA as well as their ability to work
- 2.) All illegal immigrants must have a clean record to assure the USA that we are not accepting criminals of any kind into our country.
- 3.) All illegal immigrants must be of working age and physically able to work. They should be between the ages of 21 to 39 years of age with no physical or mental handicaps. They should be coming here to be an asset to the USA and not a liability.
- 4.) According to news reports illegal immigrants should not be welcomed here since they live at a very low standard type of living not in conformity with the average American citizen. Immigrants coming to the U.S.A. in the past were good hard-working individuals coming here to work and raise a family but the current illegal immigrants are here to live by living here at our expense and destroying everything in their path and causing all hardworking retired Americans a lower standard of living. This is most unfair and unjust to the retired American population.
- 5.) USA must prepare and adopt a quota system so that no foreign country would try to overpower our military and take control of the USA. In joining the cartels and drug Lords and communist parties.

6.) Any American who has become a victim to the illegal immigrant either in property damage or loss of income should be compensated by the Federal government. My plan would remedy the entire illegal catastrophe in the USA at present.

Illegal immigration at present is of humungous proportions which are not understood by the current administration as a result of a lack of understanding and enforcement of our current immigration laws. If this continues, all Americans are in greater danger daily as a result of the continued infiltration of foreign individuals determined to destroy the U.S.A. from within. This trend must be stopped and reversed before it is too late. We Americans cannot give up our freedoms of life, liberty, and pursuit of happiness. All Americans must join with me to fight and restore peace in our land just like our forefathers did.

With the 2024 election less than 2 years away the CC Party will need a lot of help of every kind. That is obtaining signatures and staffing offices in every state. Your most important contribution to the CC Party is your vote on November 5, 2024, to elect me as your next president.

The entire process is also expensive and anyone who can support us financially will be greatly appreciated and wisely applied to the election process. You can contribute by following the procedure below.

Thank you for your interest in the CCP and May God richly reward you for your assistance to our CCP.
